WAUSEON PUBLIC SCHOOLS

The schools of Wauseon will open one week from next Monday, September 10th, there will be a full corps of teachers to greet the pupils and plans have been perfected for a pleasant and profitable year work. The one thing the American people can least afford to do in these war times is to neglect the schools or become lax in the training and education of the boys and girls. Education is one of the essential factors of civilization and there is need that civilization go forward that we shall be able to successfully meet the conditions of war time and conditions that will follow the war. Boys and girls who put forth their best endeavors to learn and improve the opportunities of school days are serving their country just as surely as the soldiers in camp or trench.

Mr. Sims has placed his personal advantage in the background and has decided that he can do more real good and give the best service by returning as principal of the High School instead of training for an officer's commission in the army. We hope every member of the High School catches and shares his spirit.

The High School will offer a four year course in Agriculture and a three year course in Domestic Science; some new subjects will also be offered including a course in vocational guidance.
